EXPERIENCE

Software Engineer

Studio Butterfly

Dec 2025 – present

- Architected an AI-powered product end-to-end, defining service boundaries, data flow, and scalability strategy across distributed components.
- Engineered a high-performance real-time socket server in **Golang** using goroutines and channels for concurrent connections, alongside NestJS REST APIs for core business logic.
- Designed a hybrid messaging layer with RabbitMQ for heavy async tasks and Kafka for high-throughput event streaming; integrated Redis for caching and Qdrant for vector search.
- Contributed to solve and implement Python ingestion pipelines with Crawl4AI and Docling to crawl and structure documents for downstream AI processing.

Backend Developer

6senseHQ

Sept 2025 – Dec 2025

- Developed scalable backend APIs using NestJS, MySQL, and MongoDB with optimized schemas and secure auth.
- Attended client meetings to gather requirements, discuss technical solutions, and translate business needs into actionable backend implementations.
- Improved system reliability through clean architecture, and team collaboration.

COURSES AND CERTIFICATES

- Coursera — Google Crash Course on Python
- HackerRank — Software Engineer Certification
- HackerRank — Problem Solving Certification
- HackerRank — SQL Certification

TECHNICAL SKILLS

Analytical: Problem Solving, Data Structures, Algorithms

Programming Knowledge: Golang, C/C++, Python, JavaScript, Java

Database Management: MySQL, Redis, MongoDB, Qdrant

Framework: Gin, NestJS

Message Brokers: RabbitMQ, Kafka

Miscellaneous: OOP, Design Patterns, System Design, WebRTC, WebSocket, gRPC, REST API, Microservices

PROJECTS

Automated MCQ Exam Management And Analysis

Golang · Python · OpenCV · SQL · Flutter · VPS

- **Engineered** a full-stack MCQ examination system integrating **ExpressJS**, **FastAPI**, **MySQL**, and **Flutter**, ensuring seamless access across web and mobile platforms.
- **Automated** OMR sheet evaluation with **OpenCV** and **TensorFlow**, enabling accurate answer extraction, real-time result generation, and PDF exports for offline use.
- **Deployed** secure APIs on a **VPS**, delivering high availability, fault tolerance, and scalability for large-scale exam sessions.

PROGRAMMING CONTESTS

- Secured 5th place in the Bijoy Ekush Programming Contest, hosted by DIU.
- Ranked 3rd place in the Unlock the algorithm, hosted by DIU.
- Competed in the International Collegiate Programming Contest (ICPC) 2023.
- Advanced to the Facebook Hacker Cup 2024.

EDUCATION

B.Sc in Computer Science And Engineering

Daffodil International University

sept 2020 – dec 2024
